

My husband and I attended your S.A.F.E. System information and we immediately realized the potential of the cylinders in cases of a medical emergency and put our names on the list for an installation at our home.

Like most seniors, we keep our front door locked at all times. Getting rid of the problem of worrying about entrance for First Responders allows you more time to concentrate on the important things that must be done.

We both know without a doubt installing an S.A.F.E. System cylinder will be a smart move on our part in many ways.

Yours truly,

Margaret Young
